

Every Dose Matters...

When treating patients in pain, the correct dosage of medication for optimal relief is critical. Gensco's unique Metered Dose Technology (MDose™) dispenses the exact amount of medication to the targeted site of injury or disease. MDose™ Technology is available as part of Gensco's accurate dosing platform. Because every dose matters, Gensco products – LiDORx, SpeedGel Rx and ColciGel are offered in metered doses to ensure that patients use the correct amounts as prescribed by their physicians.
