

Easy Steps for Patient Savings Through Your Pharmacy

The process to become a credentialed Affordable Medication Solutions RetainRx® In-Network Provider for Gensco Copay Programs is easy:

- Program Sponsors set the rules for their coupons/vouchers and RetainRx® adjudicates pharmacy transactions in accordance with those rule-sets.
- RetainRx® works in a very similar fashion to some of the other coupon/voucher programs in the industry, such as Trial Card, McKesson, PSKW, etc.
- In order to participate, individual pharmacies or the chain pharmacy representative must execute an agreement with the processor, AMS, to facilitate the payment flows from the Program Sponsor to the pharmacy through AMS.
- RetainRx® cannot be used for any patient who is covered under a prescription benefit that is provided by any government agency.
- RetainRx® is integrated into the pharmacy system just as any other third party payer.
- The pharmacy submits the RetainRx® transaction as a secondary transaction for any patient that has commercial insurance for the item.
- If the patient is uninsured or does not have coverage for the item, the pharmacy submits the RetainRx® transaction as a primary claim similar to a regular insurance claim.
- Since August 2014, RetainRx® has issued coupons/vouchers for millions in savings to patients.
- Pharmacies are normally paid within 60 days of the approved coupon transaction.

Affordable Medication Solutions' RetainRx® program is a prescription voucher program.
