

Reduce Patients' Gout Pain "At the Site" & In Their Pocket

COLCIGEL
Prepare for the Flare™

ColciGel® is a prescription transdermal gel that provides relief of acute gout flares utilizing patented Isopeutic® Transdermal Technology, US Patent #5,654,537. The Gensco® patented transdermal drug delivery system used in ColciGel® carries a proprietary formulation, through the skin to the locally affected tissues. ColciGel® is applied directly to the affected site of the gout flare and results have been observed in 3-48 hours. ColciGel® is proven to have negligible systemic absorption minimizing side effects, interactions and comorbidities caused by oral therapies and NSAIDs.

ColciGel® utilizes MDose™ Technology which dispenses the exact amount of medication (0.25 mL per pump) per application.

"In about 1 hour, patient R.C. reported improvement of symptoms, 65% within 1 hour."
